

February 12, 2006

Dear Valued Customer,

In 2005, Georgia-Pacific launched an imaging papers portfolio designed to bring added value by simplifying the paper selection process for our targeted end users. "Simply Spectrum™" provides excellent choices to meet the needs of today's primary business printing applications. Spectrum® is a strongly established brand, widely recognized across channels and consistently associated with high quality print results.

To make paper selection even simpler, we will now bring our recycled paper products into the Spectrum family. Those products currently marketed under the Eureka!® brand name will going forward be known as Spectrum Recycled Multi-Use papers. Those customers who currently purchase Eureka! will find the same reliability and high caliber results when using Spectrum Recycled Multi-Use. It's exactly the same paper they currently receive – just now identified by a new name and packaging. With this update to our portfolio, we will have a unified focus for all of our Georgia-Pacific brand products as members of the Spectrum family.

The following chart is a reference tool to assist in the transition. All products are 20 lb. basis weight, 92 bright / 145 CIE whiteness:

Spectrum Recycled Multi-Use Item #	Size	PCW % Content	Eureka! Item # <small>(to be discontinued)</small>
999916	8½ x 11	30%	061171 999686
999917	8½ x 11 3 Hole Drilled	30%	061271
999918	8½ x 14	30%	061371
999919	11 x 17	30%	061571
999920	8½ x 11	10%	059121

This transition will be implemented as a rolling change, with completion slated to occur in late April. As inventory levels of Eureka! are depleted, orders will be filled with the equivalent Spectrum Recycled Multi-Use products. If you have questions during this transition, please contact your Georgia-Pacific sales or customer service representative.

Thank you for your continued support of Georgia-Pacific. We appreciate your business!

Sincerely,

Tammy S. Larsen
